

Challenge 1

Challenge one

Heading

You can replace any of the text with what you want, but you should have the same elements with the same style!

- All the elements will be ones we have covered in class
- This is to consolidate your understanding of html elements and basic styling
- In order for us to move onto some more complex styling
- - Uh-on a list inside a list..
 - Remember to set you html out right!

HTML:

<p>, <h1>,,<h2>

,

Style:

font-size, color

Challenge two

Challenge two!

This challenge is harder but still only uses elements and style covered and the style "background-color" which works the same way as "color"
Think divs, spans and padding.

Block one

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nam facilisis vestibulum ante. Maecenas eleifend, dolor a accumsan gravida, nulla elit euismod nibh, at vehicula diam nisi nec ante. Donec a vehicula neque. Donec id tellus augue. Class aptent taciti sociosqu ad litora torquent per conubia nostra, per inceptos himenaeos.

Block two

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nam facilisis vestibulum ante. Maecenas eleifend, dolor a accumsan gravida, nulla elit euismod nibh, at vehicula diam nisi nec ante. Donec a vehicula neque. Donec id tellus augue. Class aptent taciti sociosqu ad litora torquent per conubia nostra, per inceptos himenaeos.

Block three

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nam facilisis vestibulum ante. Maecenas eleifend, dolor a accumsan gravida, nulla elit euismod nibh, at vehicula diam nisi nec ante. Donec a vehicula neque. Donec id tellus augue. Class aptent taciti sociosqu ad litora torquent per conubia nostra, per inceptos himenaeos.

Top left	Top middle	Top right
		

HTML used:

<p>, <body>, <div>, <h2>, <table>, <tr>,
<td>, ,

Style used:

color, padding-left, padding-right,
background-color, font-size, text-align

Hint: You'll need to have width and border attributes for the table

Final challenge

Challenge Three

This is more complex than the last.. but you're able to construct better looking sites

Magic spacing?

This is actually just using a table to layout the page, using the "rowspan" attribute to make the side bar!

Side-bar

This is useful for navigation around your website, perfect for next week when we introduce how to have a multipage site!

More... magic spacing?

Tp make the images fit either side, we are using a table with 4 columns.. one for the side bar, leaving three to do this magic. On each row we **span** this text across two of those columns, leaving the remaining column for the picture!

One last thing

HTML used:

`<table>`, `<body>`, `<tr>`, `<td>`, `<h1>`, `<u>`,
``, `<div>`

Style used:

`text-align`, `padding-top`,
`background-color`, `padding-bottom`,
`padding-left`, `padding-right`

Hint: It's one big table...
